

## **3D Printing Design & Engineering Conference**

April 16, 2019

Brightlands Chemelot Campus, Sittard-Geleen, The Netherlands

<https://3ddeconference.com/>

The 4th edition of the 3D Printing Design & Engineering Conference will take place on April 16, 2019, at Brightlands Chemelot Campus, in Sittard-Geleen.

The conference offers design and engineering professionals the chance to learn and to look at design challenges from different perspectives using 3D Printing/Additive Manufacturing. The goal is to make 3D printing part of every designer's DNA!

Focus topics: Visualisation tools, and 3D design & 3D engineering tools | Value Engineering | Topology Optimization | Validation | IP, liability, legal and technical issues | Reverse engineering of 3D products | Postprocessing / AMES (Additive Manufacturing Execution Systems) / (MES (Manufacturing Execution Systems) | Blockchain

On April 16 in parallel to this conference, the [3D Printing Materials Conference](#) will be held, and on April 17, 2019, the [4D Printing & Meta Materials Conference](#) will be organised. Registration is possible for a combination of these events.

For more information about the conference and registration, we invite you to visit <https://3ddeconference.com/>. For additional requests, please send an email to info [at] jakajima.eu
